

## Flipping Screen Image on Monitor

The quickest way is to use the shortcut keys that will work on several model graphic cards. Try this first:

Hit the Ctrl + Alt + one of the arrows as follows:

- + ↓ - Flip the screen upside down.
- + → - Rotate the screen 90° to the right.
- + ← - Rotate the screen 90° to the left.
- + ↑ - Return the screen to the standard landscape orientation.

If that won't work for you then you will need to get into the Display settings.

1. Right-Click on the desktop and click on "display settings". This can also be found in the Control Panel or type display settings in the search area of the task bar.
2. Once in the settings you will need to scroll down to the orientation menu and arrow down to the next menu that will give you options. It should be on Landscape which gives normal display.
