

HOW TO CHANGE YOUR COMPUTER LOG-IN ACCOUNT PASSWORD

1. Press the Ctrl, Alt and Delete buttons to get a menu:

2. Select the option to Change a password... See image below.
3. Put your current password in the Old password field and then put a secure password of at least 14 characters in the next two fields. It is very important to come up with a password that hackers will not easily figure out. Do not use consecutive numbers like 1234 and do not leave your password written down on anything near your computer. Confirm and you are done.
